

## Testimonial on ReachSIS Implementation and Educative Tech Partnership

From the outset, Louis and his team have demonstrated a strong commitment to supporting our college through the delivery of a professional and cost effective service, providing a solution aligned with our needs. We extend our sincere appreciation to the team and to those who support their work, enabling Christian organisations to strengthen their operations and implement systems that support their mission effectively.

Our lecturing and administrative teams have found the implementation of an improved system for tracking student data and progress to be highly successful. The system is user-friendly and enables staff to efficiently access the information they require.

### Core Experience

Working alongside Jason, Nathan, and the team has been an extremely positive experience. Both individuals have consistently demonstrated a high level of professionalism and support, meeting with us regularly to gain a clear understanding of our requirements. They were also open to making changes where possible, ensuring the solution remained aligned with our immediate needs. Additionally, they were willing to meet with our administrative team members to better understand their requirements and provide training on how the system operates. They are continuing working alongside us to continue to improve the system as we are growing and as our needs expand.

Using the system has been an improvement on our previous solution. It has proven to be highly user-friendly, making daily use both efficient and enjoyable.

### Value & Impact

The most valuable aspect of working with your team is your clear vision to support Christian colleges and organizations in advancing their mission. This is achieved through providing a strong operational framework, while remaining flexible and collaborative—working alongside us rather than promoting a fixed agenda or product.

We have seen noticeable improvements in our ability to capture data and generate meaningful reports tailored to our college's needs. In particular, the progress reports provided to students—covering attendance and academic performance—have been significantly enhanced.

## Testimonial on ReachSIS Implementation and Educative Tech Partnership

### **Ease & Fit**

The system has been relatively easy to implement within our existing workflows. From the outset of the project, we worked closely with the team to ensure the solution aligned with the immediate needs of our college.

### **Recommendation**

We would confidently recommend the Educative Tech team and their products.
